EDUCATION

VIT Bhopal University — Expected June 2027
Bachelor of Technology in Mechanical Engineering — CGPA: 6.35

PROJECTS

Finite Element Analysis of an IC Engine Piston

- Designed and created a precise 3D parametric model of a piston using Onshape CAD software.
- Conducted comprehensive FEA using ANSYS to analyze the piston's structural integrity and thermal behavior under high pressure and temperature loads.
- Successfully identified critical stress concentration areas and deformation patterns to assess the design's viability

TECHNICAL SKILLS

CAD Software: SolidWorks, Onshape

CAE / Simulation Software: ANSYS Workbench

Core Competencies: 3D Parametric Modeling, Assembly Design, 2D Drafting, Finite Element Analysis (FEA), Structural & Thermal Analysis

CERTIFICATIONS

NPTEL (IIT GUWAHATI)
Renewable Energy Engineering: Solar , Wind and Biomass Energy Systems — link
